Customer Journey Map

1. User Journey Flow

Below is the journey stages for a citizen attempting to dispose of a complex hazard item (e.g. AA battery):

- Stage 1: Awareness - Recognizes item is hazardous. Feels anxious about trash hazard.
- Stage 2: Scanning - Searches 'battery' in Scanner page. Llama 3.3 resolves classification under 2 seconds.
- Stage 3: Sorting - Reads sorting and safety steps. Follows terminal-taping warnings.
- Stage 4: Dropoff - Finds nearby E-waste center on map. Reads phone/hours on the marker popups.
